PROFILE

Fourth-year Electrical Engineering (English Program) student with hands-on experience in software projects, interested in project coordination, business analysis, and tech-driven roles in international environments.

EDUCATION

2022 – 2025	King Mongkut's University of Technology North Bangkok Major in Electrical engineering	Thailand
2016 – 2021	Bodindecha (Sing Singhaseni) 2 school	Thailand

PROJECTS

Nov 2025	Bangkok Transit Website - Planned the system flow and coordinated development of an interactive route planner for Bangkok's BTS, MRT, and ARL networks. - Designed the data structure by modeling transit stations as a graph and implemented Dijkstra's algorithm to calculate the shortest route. - Developed features to display the complete route, total travel time, and number of stations using Python (FastAPI) and JavaScript.	Thailand
Nov 2025	Saving Goal Bot & LINE Chatbot - Planned project flow and coordinated development of a LINE chatbot and web app. - Built and deployed the system using Node.js, Express.js, and Railway, with Google Sheets integration via Apps Script. - Managed tasks, testing, and improvements based on user interaction.	Thailand
Oct 2025	Engineering Mini-Project Electric-Drive - Developed a Human-Machine Interface (HMI) application to control a stepper motor. - Implemented serial commands for start, stop, direction, and speed RPM adjustment. - Added live status display to monitor operation in real time.	Thailand

ADDITIONAL INFORMATION

- **Technical Skills:** Web-based project understanding(Python, C, Java, HTML, CSS, JavaScript), API integration and backend fundamentals(Node.js, LINE Messaging API).
- **Soft Skills:** Leadership, Collaboration and Teamwork, English Communication, Time Management, Problem-solving.
- **Languages:** Thai, English.
