PROFILE

Fourth-year Electrical Engineering (English Program) student with hands-on experience in software projects, interested in project coordination, business analysis, and tech-driven roles in international environments.

EDUCATION

2022 – 2025	King Mongkut's University of Technology North Bangkok	Thailand
	• Major in Electrical engineering	
2016 – 2021	Bodindecha (Sing Singhaseni) 2 school	Thailand

PROJECTS

Nov 2025	Bangkok Transit Website	Thailand
	- Built an interactive route planner for Bangkok's BTS, MRT, ARL system using Python (FastAPI) and JavaScript. - Modeled stations as a graph and implemented Dijkstra's algorithm to find the shortest route. - Displayed the full route, total travel time, and number of stations.	
Nov 2025	Saving Goal Bot & LINE Chatbot	Thailand
	- Built a LINE Chatbot using Node.js and Express.js deployed on Railway. - Integrated with Google Apps Script to log user data automatically into Google Sheets. - Created a companion web app for saving calculations using HTML, CSS, and JavaScript.	
Oct 2025	Engineering Mini-Project Electric-Drive	Thailand
	- Developed a Human-Machine Interface (HMI) application to control a stepper motor. - Implemented serial commands for start, stop, direction, and speed RPM adjustment. - Added live status display to monitor operation in real time.	

ADDITIONAL INFORMATION

- **Technical Skills:** Programming (Python, C, Java, HTML, CSS, JavaScript), understanding of embedded systems and Internet of Things, experience with MATLAB, Arduino, and ESP32.
- **Soft Skills:** Leadership, Collaboration and Teamwork, English Communication, Time Management, Problem-solving.
- **Languages:** Thai, English.
